

S.P.A.M. WEEKLY

Week 9: 3/3/25 - 3/9/25

Week Nine

Anemone's intake works! After a long week of testing intakes, we found a mechanism that works. With everything put together, S.P.A.M. ran the first driver/autonomous practice of the season. We also tuned barge scoring and made improvements in our algae grabber mechanism on the elevator. With less than 2 weeks until the orlando regional, we will finally be running regular drive practice and autonomous tuning sessions. There is a parent travel meeting this monday, so tell your parents to attend because we will be discussing important travel information for our regionals!

Mechanical

Progress:

- Coral intake completed
- Modified algae grabber
- Removed cage climber
- Replaced turn motors with Kraken x44's

Next Week's Goals:

- Build new cage climber

Programming

Progress:

- Pushed auto-intake code
- Pushed autonomous code
- Tuned L4 and barge
- Created button for algae descoring

Next Week's Goals:

- Finalize more autos
- Run driver practice
- Tune L1

Electrical

Progress:

- Wired 3rd Limelight
- Wired X44s
- Replaced Network Hub

Next Week's Goals:

- Check can wires for issues
- Rewire algae intake (if installed)

Field

Progress:

- Barge april tags
- Velcro the reef to the carpet
- Barge ribs

Impact

Progress:

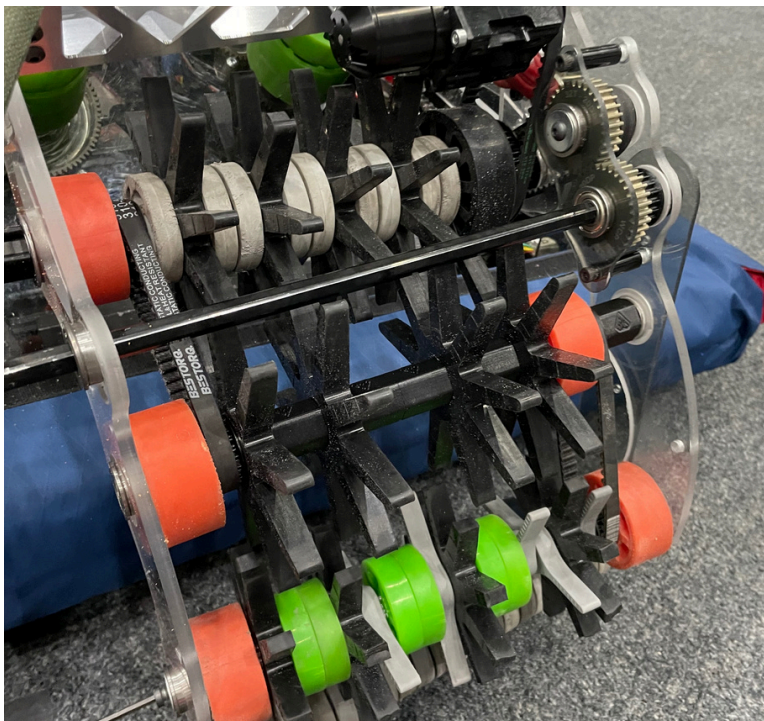

- Planned out impact presentation

Next Week's Goals:

- Finalize impact test
- practice presentation
- get board ready

ATTENTION

**PARENT MEETING MONDAY!! ORLANDO
IN LESS THAN 2 WEEKS!**
